

Attached are the revenue and expenditure reports for the two month period ending February 28, 2014. The expenditure report shows actual expenditures as of the end of the month as well as purchase orders outstanding and compares to the annual budgeted appropriations. The explanations provided are based on the year to date amounts excluding outstanding purchase orders as purchase order amounts may contain a full year of encumbrance. The revenue report shows actual receipts recorded as of the end of the month compared to the annual budgeted estimations. In this packet, the City's major funds (General Fund, Equipment Replacement Fund, Technology Management Fund, Water & Sewer Utility Fund and Solid Waste Fund) are presented.

GENERAL FUND

General Fund revenues are higher than the pro-rata expected at this point in the fiscal year due to the receipt of a large portion of property taxes, as expected. Property taxes bills are typically mailed in November and are delinquent February 1. All other revenue categories are above the prorata amount for the month indicating higher than expected activity in permitting, facility rentals, and recreational activities. The Intergovernmental revenue item is the amount due from Southside Place in accordance with the Master Interlocal Cooperation Contract. Payments are due the first day of April, July and October. The amount due in April was received in January. Specific revenue sources that may be below 16.67% (2/12th) are monitored throughout the remainder of the fiscal year and adjusted as appropriate.

General Fund departmental expenditures are, on average, in-line with the estimated pro-rata appropriations (2/12 = 16.67%). The Finance Department expenditures are above the pro-rata amount for the month primarily due to the advanced payment of the property and liability insurance premiums for a portion of the current year amount due. The premium invoice is paid in full in order to take advantage of the 10% discount offer by the Texas Municipal League Risk Management Pool.

WATER & SEWER UTILITY FUND

Through February, Water and Sewer revenues are as expected for this time of year.

The fund expenditures other than debt service are at or below the 16.67% pro-rata appropriation for the fiscal year. Debt Service payments are due semi-annually on February 1 and August 1.

SOLID WASTE FUND

Solid waste collection revenues are on target for this point in the year. Sales of Recyclables are above the prorata portion for the year; however, recyclable sales can fluctuate and we do not anticipate the high sales trend to continue through the remainder of the year.

Expenditures are slightly below the prorated amount of 16.67% for the month. Sales of Recyclables are above the prorata portion for the year; however, recyclable sales can

fluctuate and we do not anticipate the high sales trend to continue through the remainder of the year.

VEHICLE REPLACEMENT FUND

The Vehicle Replacement Fund finances the purchase of vehicles routinely used in providing City services, excluding the large fire pumper trucks. Each department makes contributions to the fund based on the estimated life and replacement cost of the vehicles it uses. The fund purchases vehicles when a combination of age and repair cost indicates the machine or vehicle has reached the end of its service life; therefore, the expenditures patterns do not follow the pro-rata model.

TECHNOLOGY MANAGEMENT FUND

Technology is integral to the City's ability to provide efficient and necessary services to the citizens. The Technology Management Fund was created to centralize those expenditures, consolidate the management of the resources needed to maintain existing systems and to deploy new solutions. The City continues to upgrade and consolidate computer servers and networking infrastructure, bringing them back to industry standards and best practices. The long term goal is to minimize additional assets as new technologies are introduced, minimize future maintenance costs, and at the same time, provide high availability and disaster recovery through the use of technologies such as clustering, virtualization and other techniques.

Revenues are as expected for the current period. Overall expenditures are slightly above the prorata portion for this point in the fiscal year. These will be monitored and analyzed over the next few reporting periods.
