FOR IMMEDIATE RELEASE

West University Place Prepares for the East Side Drainage Project with a Second Town Hall Meeting

WEST UNIVERSITY PLACE, TX –With completion of the Buffalo Speedway Project in sight, the city continues to make drainage a priority with improvements planned for the drainage system on the east side of the city. A town hall meeting will be held at the Community Building, 6104 Auden, on March 29 from 6 p.m. – 8 p.m.

In 2021 the city conducted a City-Wide Drainage Modeling Study and a preliminary engineering report (PER). The results of the study identified the City’s drainage system east of Buffalo Speedway as unable to handle a 2-year storm event, which prompted the recommendations for the planned improvements.

Package One construction is slated to begin in April 2023 and includes paving and drainage upgrades along University Boulevard from Buffalo Speedway to Kirby Drive.

Now at the 100% design milestone, the city encourages residents to attend the town hall meeting to hear presentations from staff, ask questions, and learn more about how the improvements of Package One will serve the community now and in the years ahead.

The first town hall meeting was held in August 2022 when Package One reached the 75% design milestone.
