FOR IMMEDIATE RELEASE

West University Place Breaks Ground for the Law Street Water Line Project

WEST UNIVERSITY PLACE, TX – The City of West University Place recently held a groundbreaking event to kick off the Law Street Water Line project which will connect the homes of residents in the 4100 & 4200 blocks of Law Street to the West University Place water distribution system. Currently, those residents receive water from the City of Houston.

“We are delighted to finally be adding these residents to West U’s water system where they belong,” said Mayor Susan Sample. “This project will ensure that all residents of West University Place receive the same quality water service. In addition, this project eliminates the need for separate notifications during emergencies related to the water system.”

The project perimeters include Law Street from Community Drive to Academy Street and Fairmont Street from Law Street to Albans Street. The installation of approximately 1,500 linear feet of 4-inch water line will be primarily by trenchless construction with some areas of open-cut construction and will also include the removal and replacement of some roadway paving and sidewalk as well as site restoration after construction.

The total cost for the project is estimated at \$265,617 and is projected to be completed by September 2023.

This is the second of several major capital improvement projects identified as part of the City’s Foundation for the Future Plan. In September 2022, the West U City Council authorized the sale of Certificates of Obligation to fund these improvements.
