

Inventory Summary

PWS Name: City of West University Place

PWSID: TX1010027

Enter Date Last Updated: 10/15/24

Purpose of this worksheet: For water systems to provide a summary of their service line inventory, including information on ownership, inventory format, and the number of service lines for each of the four required materials classifications.

Part 1. General Information

1. Is this the Initial Inventory or an Inventory Update ?	Initial Inventory
2a. Who owns the service lines in your system? <i>If other, please explain below.</i>	Ownership is split, meaning that the system owns and portion and the customer owns a portion
2b. Is there documentation that defines service line ownership in your system, such as a local ordinance? <i>If yes, please describe below and explain where ownership is split (e.g., property line, curb stop).</i>	Yes
Sec. 86-63. City ownership, control and maintenance. Water meter facilities (including the meter box, the meter itself and facilities "upstream" of the output flange of the meter) are:(1)Owned by the city;(2)Under the supervision and control of the director; and(3)Eligible for city maintenance. It shall be unlawful for any person to operate, remove or tamper with such facilities unless authorized to do so by the director. (b)User's responsibility. All facilities "downstream" of the output flange of the meter, including any connecting devices, shall be maintained in good condition by the user.	
3a. Describe when lead service lines were generally installed in your system.	
Prior to 1980	
3b. When were lead service lines banned in your system? Reference the state or local ordinance that banned the use of lead in your system.	
Rules and Regulations for Public Water Systems, 337.206(b) 07/01/88, October 13, 1980 Ordinance # 1161 - "The use of lead or type M copper waste rtube is hereby prohibited in water ditribution piping"	
4. Do you have lead goosenecks, pigtails or connectors in your system?	Don't Know
5. What is your overall level of confidence in the inventory (<i>i.e.</i> , "Low", "Medium", or "High.") Please explain your rationale below.	
High	

Part 2. Inventory Format

Describe your inventory format in the space provided below (*e.g.* , the **Detailed Inventory** worksheet, custom spreadsheet, GIS map). Provide the filename and/or web address if applicable. **Note that the state may require you to submit your detailed inventory of each service line in your distribution system.**

Detailed inventory Worksheet

Part 3. Inventory Summary Table ¹

If you are using the **Detailed Inventory** worksheet, the classifications you select in the Column "Entire Service Line Material Classification" (Column X) will be used to calculate the total number of service lines for each of the four material classifications below. Otherwise, enter the number of service lines in the aqua-colored cells. **Remember this is the classification for the entire service line.**

Service Line Material Classification	Definition	Total Number of Service Lines (REQUIRED to be reported under the LCRR)
Lead	Any portion of the service line is known to be made of lead. ²	1

Galvanized Requiring Replacement (GRR)	The service line is not made of lead, but a portion is galvanized and the system is unable to demonstrate that the galvanized line was never downstream of a lead service line.	6
Non-Lead	All portions of the service line are known NOT to be lead or GRR through an evidence-based record, method, or technique.	6,251
Lead Status Unknown	The service line material is not known to be lead or GRR. For the entire service line or a portion of it (in cases of split ownership), there is not enough evidence to support material classification.	0
TOTAL		6,258

Notes

¹ This summary table is for reporting material for the entire service line connecting the water main to the customer's plumbing. See the **Classifying SLs** worksheet for additional guidance on assigning a materials classification to the entire service line when ownership is split. Remember that systems must track the system-owned and customer-owned portions separately in their inventory.

² A lead-lined galvanized service line is consistent with the definition of an LSL under the LCRR ("a portion of pipe that is made of lead, which connects the water main to the building inlet") (40 CFR §141.2) and must therefore be classified in the inventory as an LSL. Do NOT, however, count non-lead service lines with a lead gooseneck or pigtail as lead service lines unless required by your state.
